10 h/week.

MATERIALS AND FINISHES

It offers a unique set of features such as its splash-proof frame coating that protects against moisture damage, its POLY-V® belt drive system which through the 6 Poly-V ribbed belts with Kevlar cords are designed to deliver an incredibly smooth and fluid ride, with an extremely realistic feel. Kevlar cords are stronger and last longer than materials traditionally used in belt drive systems, resulting in a virtually maintenance-free product that does not need to be tensioned or lubricated. High-quality bearings, High-quality materials: CP-treated seat posts with anti-corrosion function.
