Bodytone is the brand for fitness professionals that's available to anyone who wants to work out and take care of themselves in the gym or at home.

Bodytone's primary goal is to improve people's health and happiness by making exercise accessible and fun.

**Move.
Live.
Enjoy.**

Our passion for sport means we are fully in-tune with the needs of our customers. Since Bodytone was first launched, we have worked closely with fitness professionals by listening to their needs and creating products and solutions that improve their sports centres, their clients' experiences and financial results.

Bodytone equips both large fitness centres and independent gyms, providing robust solutions for the most demanding clients. We also provide trusted solutions for hotels, residential complexes, universities, corporate settings and clinics.

We specialise in technologically advanced products which are designed to monitor training stats and provide an interactive user experience.

The key to Bodytone is to help professionals boost their business

**TAILOR-MADE

UNIQUE GUARANTEES**

**PROFITABILITY FOR
THEIR BUSINESS**

CREATIVE PROCESS: **HIGH-LEVEL DESIGNS**

Bodytone's design team works every day to create world-class equipment through a successful formula that integrates research centres, professionals and users.

Bodytone has collaboration agreements with relevant research centers around sports and biomechanics from prestigious universities such as the University of Valencia or the Catholic University of Murcia in order to take its products to a higher level in order to provide the maximum experience to the users.

We equip both large gym chains and independent centers, responding with solvency to the highest levels of demand. Likewise, hotels, residential complexes, universities, corporate spaces and clinics also trust us.

LEADER

Leader is our line of greatest benefits for gyms and athletes looking for the best cardio equipment.

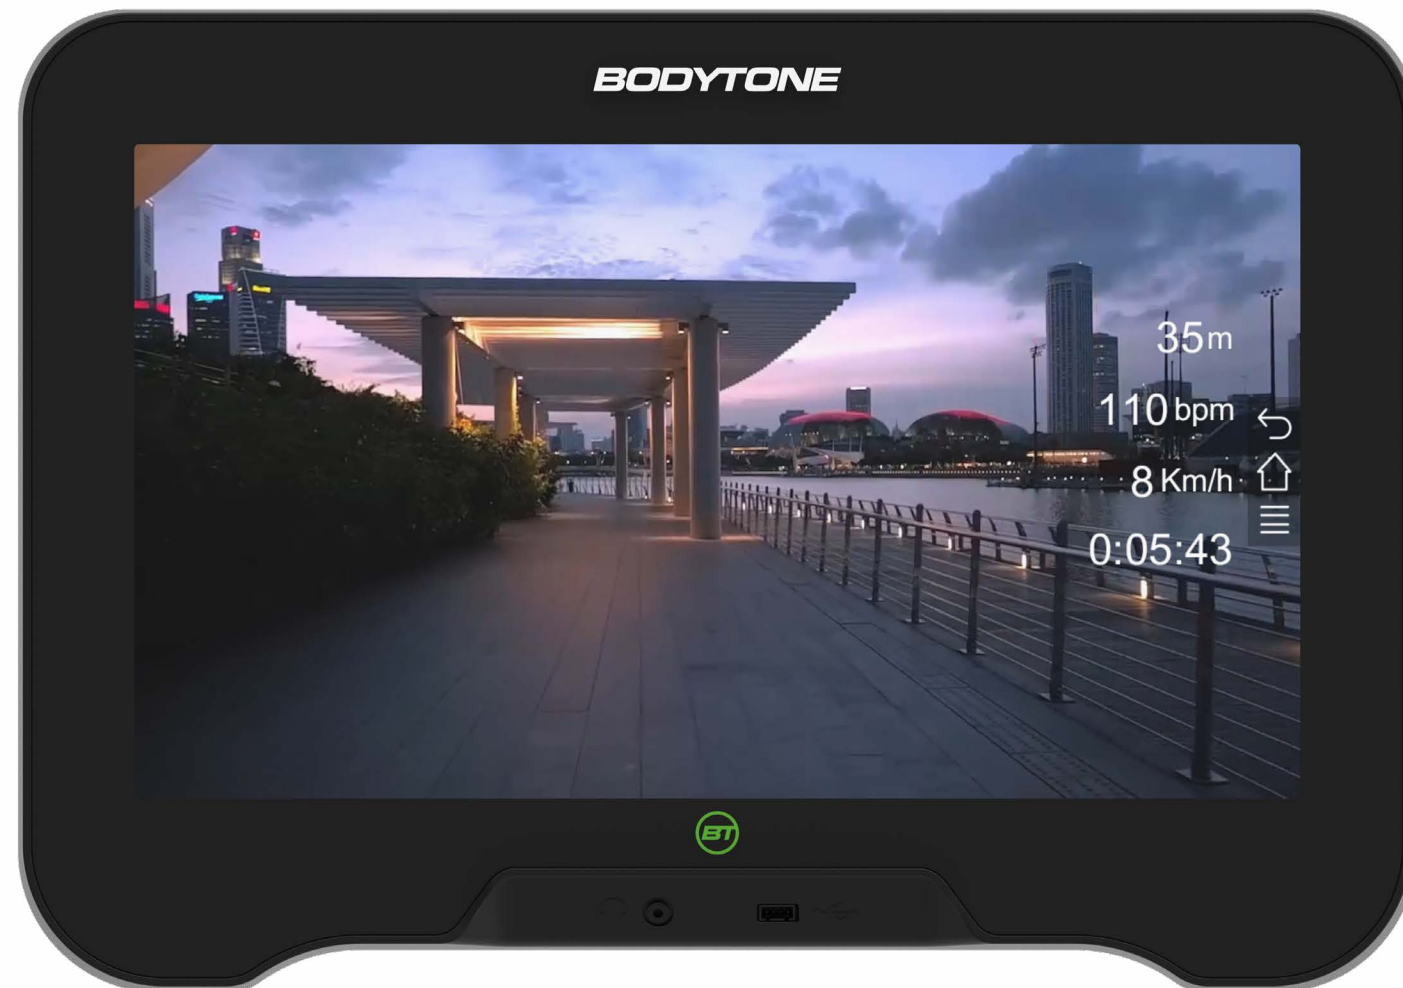

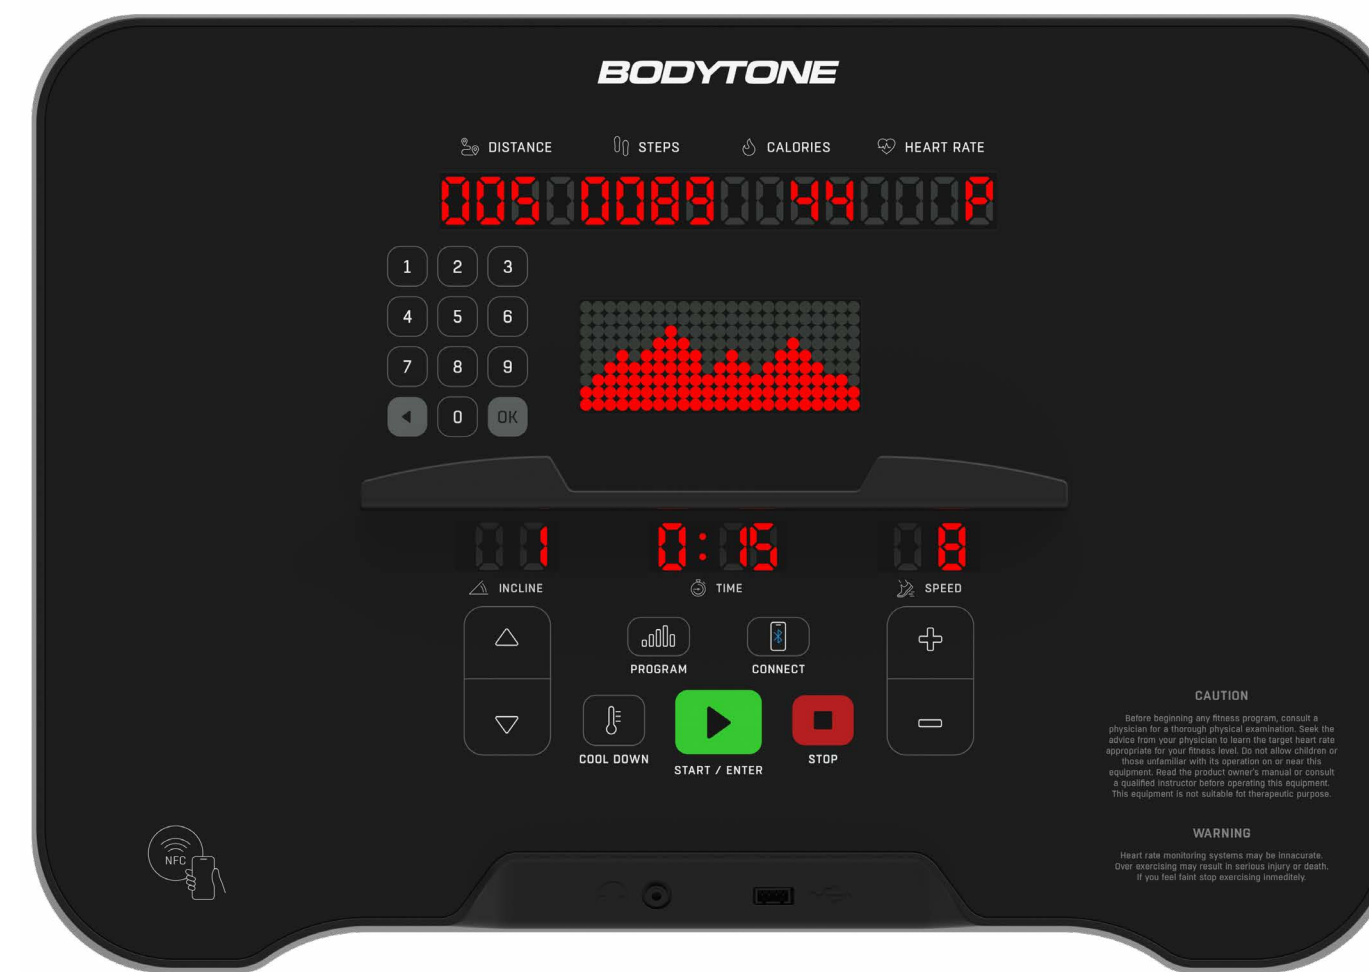

At Bodytone, one of our main objectives is to offer fitness professionals the highest quality equipment for their gyms. With this in mind, we design strength training machines with the comfort and efficient use of both the gym and the end users at the forefront.
